- Daily calibration of several instruments done
- Performed prior to the start of clinic day.
- Generally done or delegated by the 1st nurse on call for that day
- All HemoCue and Blood Glucose Monitors in the clinic can be done at the same time.
- Once per month, a lab sample sent for correlation. (note on req and sample "QA")
- Once per month, equipment should be cleaned.

Point of Care Quality Assurance

- Blood work done in the morning, to ensure completion before afternoon flight.
- Fasting patients should be done first.
- Check the weather, and consult with NIC/ reception staff to find out of flights may be cancelled
- VacuTainer products used, exam rooms should be restocked on admin day.
- Straight needles preferred, as samples taken with butterfly needles are prone to hemolysis. (they remain available for use with patients who are 'difficult sticks')

Routine Bloodwork
