Influenza-like Illness (ILI) case definition:

ACUTE ONSET of respiratory illness with fever and cough and with one or more of the following:

- sore throat
- arthralgia
- myalgia, or
- prostration - which could be due to influenza virus.

In children under 5, gastrointestinal symptoms may also be present.

In patients under 5 or 65 and older, fever may not be prominent.

Public Health Agency of Canada, 2005.

Enter ticks or checks for ILI cases seen daily:

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
