

A spectrum of inhaled treatment options for a spectrum of COPD patients

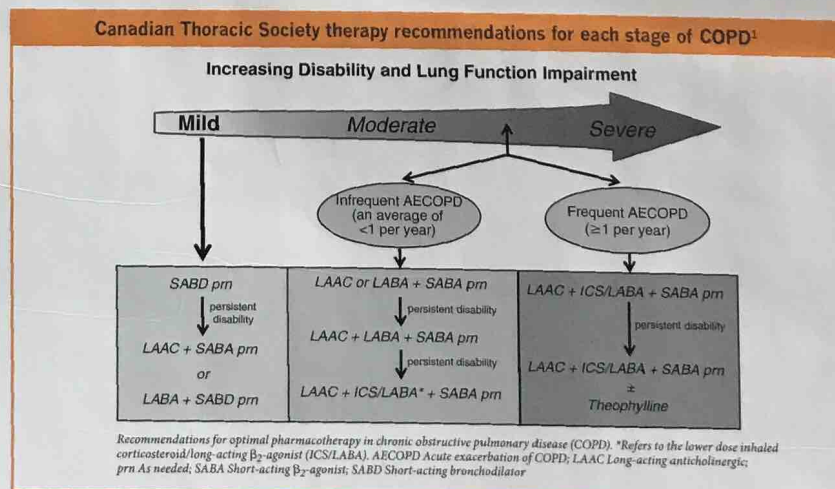

Select inhaled bronchodilators to help manage chronic obstructive pulmonary disease (COPD)

SHORT-ACTING		LONG-ACTING			CORTICOSTEROID + LONG-ACTING
SABD ² Short-acting bronchodilator	SABA ³⁻⁶ Short-acting β_2 -agonist	LAMA ⁷⁻⁸ Long-acting muscarinic antagonist	LABA ¹⁰⁻¹² Long-acting β_2 -agonist	LAMA/LABA ^{13,14} Long-acting muscarinic antagonist/ long-acting β_2 -agonist	ICS/LABA ¹⁵⁻¹⁷ Inhaled corticosteroid/ long-acting β_2 -agonist
 ATROVENT[®] HFA (ipratropium bromide) Dosing:† Three or four times daily	 AIROMIR[®] (salbutamol sulphate) Dosing:† Three or four times daily	 SEEBRI[®] BREEZHALER[®] (glycopyrronium bromide) Dosing:† Once daily	 ONBREZ[®] BREEZHALER[®] (indacaterol maleate) Dosing:† Once daily	 ULTIBRO[®] BREEZHALER[®] (glycopyrronium bromide/indacaterol maleate) Dosing:† Once daily	 ADVAIR[®] DISKUS[®] (fluticasone propionate/salmeterol xinafoate) Dosing:† Twice daily
	 VENTOLIN[®] HFA (salbutamol sulphate) Dosing:† Four times daily	 SPIRIVA[®] (tiotropium bromide monohydrate) Dosing:† Once daily	 FORADIL[®] (formoterol fumarate) Dosing:† Twice daily	 ANORO[®] ELLIPTA[®] (umeclidinium bromide/vilanterol trifluoromethanesulfonate) Dosing:† Once daily	 SYMBICORT[®] TURBUHALER[®] (budesonide/formoterol fumarate dihydrate) Dosing:† Twice daily
	 VENTOLIN[®] DISKUS[®] (salbutamol sulphate) Dosing:† Three to four times daily	 TUDORZA[®] GENUAIR[®] (aclidinium bromide) Dosing:† Twice daily	 SEREVENT[®] DISKUS[®] (salmeterol xinafoate) Dosing:† Twice daily		 BREO[®] ELLIPTA[®] (fluticasone furoate/vilanterol) Dosing:† Once daily
	 BRICANYL[®] TURBUHALER[®] (terbutaline sulfate) Dosing:† As required
