applied correctly.

My Asthma Action Plan

Goals of my asthma action plan

- · No physical asthma symptoms
- No restrictions to normal activities
- No work or school missed because of asthma
- · Minimal use of a reliever inhaler

100%

 No emergency visits or hospitalization for asthma

80%

Knowing my asthma triggers

- Animal allergens and secretions
- Colds and infections
- Dust mites
- Emotional anxiety and excitement
- Food allergies
- Gastroesophageal reflux
- Hormonal changes
- Inhaled irritants (Perfume, talcum powder, hair spray, chalk dust, pesticides)
- Medications
- Mold
- Pollen
- (ozone, sulfur dioxide, auto exhaust, fire/wood stove smoke)
- Vigorous exercise
- Weather (extreme temperatures, windy conditions, changes in humidity/barometric pressure)

My asthma is well controlled

- o Breathing is normal
- o Sleep through the nights
- o Can do all usual activities
- o No coughing, wheezing or tightness in the chest

What should I do?

Continue my usual treatment as follows:

PEAK FLOW 50% My asthma is getting worse

I have ANY of these symptoms:

- o Shortness of breath during the day or night
- o Coughing, wheezing or tightness in the chest
- o Coughing at night more than 1 night per week
- o Can do some but not all usual physical activities
- o Using quick relief medicine more than 3 times per week
- o First signs of a cold or flu

What should I do?

Increase my usual treatment as follows:

DANGER! Get help now!

I have ANY of these symptoms:

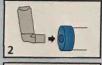

50%

- o Shortness of breath at rest
- o Medication does not help within 10 minutes
- o Difficulty walking or talking
- o Sucking in of the skin at the front of the neck
- o Lips and/or fingernails turn blue
- o IF YOU ARE IN ANY DOUBT ...

CALL AN AMBULANCE OR SEEK IMMEDIATE MEDICAL ATTENTION
