Course Outline

i-STAT Analyzer Training

Course Description

A 30 minute course designed for Registered Nurses working in Nursing Stations that have the i-STAT analyzer. It covers the parameters of use, sample collection, processing and quality control checks for the i-STAT analyzer.

Prerequisites

There are no prerequisites for this course.

Training/Learning Outcomes

After completion of this course, participants will be able to:

- Identify parameters of using the i-STAT analyzer in FNHA sites
- Describe the basic i-STAT cartridge handling guidelines
- Describe proper sample collection and handling practices
- List factors that may affect the sample prior to analysis
- Review results
- Preform basic Quality Control

Target Audience

Nurses working in remote Nursing Stations that have the i-STAT analyzer.

Training Delivery

Training is a combination of online and an on-site competency checklist.

Session Content

- FNHA i-STAT Module
- Quiz

Facilitator/Trainer Info

This course is provided by the Nursing Practice and Education Team. Once you register via FNHA Learning Space, an email with instructions will be sent to you from Talent Management
